- **Immediately Available**
- **Ready to relocate anywhere in Australia**

PROFILE

To secure a challenging role, where I can leverage my comprehensive experience to drive successful project outcomes. Having more than 10 years of experience in web application development. I have extensive experience using Agile methodology as the SDLC method. Good exposure to various domains like HR, telecom, manufacturing, banking, and e-commerce

TECHNICAL SKILLS

Technology	Years of Experience
Angular 2-14, Typescript, ES6,SCSS Javascript, HTML, CSS, SVN GIT, JIRA, Agile, Scrum NodeJS, React, Tailwind, NextJS	10 years
MySQL, GCP, Azure, SQL, Power BI	1 year
Networking: Routing, Switching, Protocols, Adobe After Effects, Adobe Premier Pro, Python, Java, DataScience	6 months

EXPERIENCE

Companies	Role	Location	Tenure
WooliesX	Javascript Developer	Remote, Sydney	Aug 2022 to June 2023
Bank of America	Software Engineer 2A	Chennai, India	Sep 2021 to May 2022
Prodapt	Lead Engineer	Chennai, India	October 2019 to Sep 2021
Renault Nissan	Assistant Manager	Chennai, India	July 2017 to October 2019
HCL	Lead Engineer	Chennai, India	Dec 2013 to July 2017
Worklogix	Developer	Chennai, India	Aug 2012 to Nov 2013

ROLES AND RESPONSIBILITIES

- Led end-to-end software development lifecycle, including analysis, design, development, implementation, and debugging.
- Expertly developed and maintained web applications utilising Angular and other relevant technologies.
- Worked closely with technical architects and clients to refine UI designs and implement enhancements.
- Effectively communicated with backend teams to integrate REST APIs and ensure data consistency.
- I worked as part of the data visualisation team on converting transactional data into analytical data.
- I have been involved in the ETL process using SAP, batch jobs, and data science.
- I have used the Dojo framework to represent analytical data in charts and the Angular framework to highlight the analytical data when listing desired results in the frontend.
- I have used Google Analytics in GCP, Tableau, and Power BI in Azure for the visual representation of data in the UI.
- Conducted Proof of Concept (POC) activities for new features and technologies, ensuring innovation.
- Mentored team members, conducted R&D for emerging technologies, and facilitated continuous learning.
- Developed windows based user interfaces for CLI operations in Linux environments, enhancing system monitoring and performance.

TRAININGS

- Hardware: Desktop, Laptops, Server, Printer
- Trained in CCNA
- Sun certified Java programmer
